PROFILE

I am very enthusiastic and excited to work as a young person who has never worked in this field before. As a 18-year-old young man, I love using computers from a young age. I know how to use the programs on the computer faster and more efficiently. I like socialising and establishing a healthy communication. In this way, I believe that I will get along very well with my teammates and I want to prove it.

WORK EXPERIENCE

BLOGGER   2018-2020

I opened a channel on YouTube called Devicealimi. And on that channel, I was teaching how to install cracked game applications. I made my first website after creating the YouTube channel. This website was made with blogger. Link

WORDPRESS   2020-2022

I was trying to learn WordPress in 2020. I learned many plugins. Elementor, YoastSeo, Map and etc. I created my own website, added a domain and added it to Google. I created many websites with WordPress. E-commerce, watching movies and downloading applications.

PYTHON   2022-2023

I started writing code in 2022, thanks to the guidance of my teachers at the University. I first started with the Python programming language. Later, I improved myself and solved algorithm problems.

FRONT END   2023-2024

In 2023-2024, I started front end coding. I looked at Html Css courses on YouTube. Then I realized that this was not enough for me. That's why I improved myself by taking Udemy courses.
