PROFILE

I have a strong passion for learning new technologies and continually developing myself. In 2022, I began programming with Python through my university, where I worked on mini-projects using Django and CRUD operations. However, I found it less engaging over time and shifted my focus to frontend development. The wide range of technologies available in frontend has allowed me to work without losing interest. I enjoy socializing and building healthy communication. I would love to collaborate with you, not driven by financial motives but by the opportunity to grow together.

MY EXPERIENCE

MATRİX ACADEMY WORKSHOP   2024.05

I participated in a workshop at Matrix Academy, where I developed a mini guess-the-number game website using custom HTML, CSS, and JavaScript.

SPELYA   2024.08

I am currently working as a Next.js developer at Spelya Software, where I have built dynamic websites that integrate APIs and follow UI/UX design principles. I have also developed fast, SEO-optimized websites.

JET ACADEMY HACKATHON   2024.09

I was tasked with creating an Airbnb clone within 24 hours, which proved to be a valuable learning experience. I gained skills in building websites rapidly, utilizing essential UI libraries, integrating APIs, and more.
